

AMENDMENTS TO THE SPECIFICATION

Page 1, between the title and the first paragraph, insert and center:

BACKGROUND OF THE INVENTION.

Page 4, before the first paragraph, insert and center:

SUMMARY OF THE INVENTION.

Page 6, between the third and fourth paragraphs, insert and center:

BRIEF DESCRIPTION OF THE DRAWINGS.

Page 7, between the first and second paragraphs, insert and center:

DETAILED DESCRIPTION OF THE INVENTION.

Page 13, third paragraph, delete in its entirety, and replace with the following new paragraph:

The doctor's turning the handle and holding it in that turned position causes plug 70 to rotate, which provides free passage for the flush solution from reservoir 24 to compartment 26, 126, as illustrated in Figures 9A, 9B and 9C. The flush solution then circulates in tubes 64 and 66 via chamber 62, and therefore in lines 12 and 16. The contrast fluid previously used is carried over by the saline solution, and any air bubbles which have been retained along pressure line 16 are evacuated in order to reduce the risk of incorrect pressure measurements.
